IDENTIFICATION SECTION

Product Name

PARAGON

Use

Commercial Strength Neutralising Ready to Use spray.

DESCRIPTION

PARAGON contains BN-30 a non-toxic compound authorized for use by the MINISTRY of AGRICULTURE & FISHERIERS of New Zealand under category C 32 (Deodorant cleaner) and is allowed in meat, game & fish areas. PARAGON is an odour neutralizer, which reacts with the odour molecule and alters the odour molecule to leave the area odourless. To this odour neutralizing compound a fragrant reodourant signature perfume has been added to indicate the area sprayed. The signature perfume is linked to the neutralising agent and will reduce completely leaving only a natural no odour area.

DIRECTION

PARAGON concentrate can be sprayed from a hand trigger spray bottle directly on to any odour source for instant removal of all biological odours or sprayed into the air to instantly neutralize air odours.
