

1. Identification of Substance & Company

Product	
Product name	Fruity Disinfectant
HSNO approval	HSR002530
Approval description	Cleaning Products (Subsidiary Hazard) Group Standard 2017
UN number	3082
DG class	9
Proper Shipping Name	ENVIRONMENTALLY HAZARDOUS SUBSTANCE, LIQUID, N.O.S. (contains Quaternary ammonium compounds, di-C8-10-alkyldimethyl, chlorides)
Packaging group	
Hazchem code	3Z
Uses	Disinfectant cleaner
Company Details	
Company	GreenEarth Solutions Ltd
Address	PO Box 64-125
	Botany
	Auckland 2163
	New Zealand
Telephone	0064 9 272 4141
Email	mail@greenearth.co.nz
Website	www.greenearth.co.nz
	o

Emergency Telephone Number: 09 272 4141

2. Hazard Identification

Approval

This product is an approved substance under the Hazardous Substances and New Organisms Act (HSNO, Approval HSR002530, Cleaning Products (Subsidiary Hazard) Group Standard 2017). The substance has been classified as hazardous according to the criteria in the Hazardous substances (Minimum Degrees of Hazard) Notice 2017. Classes Hazard Statements

6.3A	H315 - Causes skin irritation.
8.3A	H318 - Causes serious eye damage.
9.1A	H410 - Very toxic to aquatic life with long lasting effects.

SYMBOLS DANGER

Other Classifications

There are no other classifications that are known to apply.

- Precautionary Statements
- P101 If medical advice is needed, have product container or label at hand.
- P102 Keep out of reach of children.
- P103 Read label before use.
- P264 Wash hands thoroughly after handling.
- P273 Avoid release to the environment.
- P280 Wear protective gloves/eye protection/face protection*.

P302+P352 - IF ON SKIN: Wash with plenty of soap and water. P332+P313 - If skin irritation occurs: Get medical advice/ attention.

Page 1 of 7 November 2019

P362 - Take off contaminated clothing and wash before re-use.

P305+P351+P338 - IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P310 - Immediately call a POISON CENTRE or doctor/physician.

P391 - Collect spillage.

P501 - Dispose of contents/container in accordance with local/regional/national/international regulation.

3. Composition / Information on Ingredients

Component	CAS/ Identification	Conc (%)
Quaternary ammonium compounds, di-C8-10-alkyldimethyl, chlorides	68424-95-3	3.2%
Alcohol ethoxylate, linear and/or secondary	mixture	1.0%
EDTA, Sodium Salt	64-02-8	0.5%
Fragrance	proprietary	0.25%
water	7732-18-5	balance

This is a commercial product whose exact ratio of components may vary. Trace quantities of impurities are also likely.

4. First Aid

General Information	
	product container or label at hand. You should call the National Poisons Centre if you feel
that you may have been harmed,	burned or irritated by this product. The number is 0800 764 766 (0800 POISON) (24 hr
emergency service).	
Recommended first aid	Ready access to running water is required. Accessible eyewash is required.
facilities	
Exposure	
Swallowed	IF SWALLOWED: Call a POISON CENTRE or doctor/physician if you feel unwell. Rinse
	mouth. Do NOT induce vomiting. Give a glass of water to drink. Contact a doctor if
	experiencing any symptoms.
Eye contact	IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if
	present and easy to do. Continue rinsing. Immediately call a POISON CENTRE or
	doctor/physician.
Skin contact	IF ON SKIN: Wash with plenty of soap and water. If skin irritation occurs: Get medical
Skill contact	
	advice/ attention. Take off contaminated clothing and wash before re-use.
Inhaled	IF INHALED: If breathing is difficult, remove to fresh air and keep at rest in a position
	comfortable for breathing. If experiencing respiratory symptoms: Call a POISON
	CENTRE or doctor/physician.
Advice to Dector	

Advice to Doctor Treat symptomatically

5. Firefighting Measures

Fire and explosion hazards: Suitable extinguishing substances:	There are no specific risks for fire/explosion for this chemical. It is non-flammable. Carbon dioxide, extinguishing powder, foam.
Unsuitable extinguishing substances:	Unknown.
Products of combustion:	Carbon dioxide, and if combustion is incomplete, carbon monoxide and smoke. Water. May form toxic mixtures in air and may accumulate in sumps, pits and other low-lying spaces, forming potentially explosive mixtures.
Protective equipment:	Self-contained breathing apparatus. Safety boots, non-flammable overalls, gloves, hat and eye protection.
Hazchem code:	3Z

6. Accidental Release Measures

Containment	If greater than 100L is stored, secondary containment and emergency plans to manage any potential spills must be in place. In all cases design storage to prevent discharge to storm water.
Emergency procedures	In the event of spillage alert the fire brigade to location and give brief description of hazard. Stop the source of the leak, if safe to do so. Wear protective equipment to prevent skin, eye and respiratory exposure. Clear area of any unprotected personnel. Contain using sand, earth or vermiculite. Do not use sawdust. Prevent by whatever means possible any spillage from entering drains, sewers, or water courses. (If this occurs contact your regional council immediately).
Clean-up method	Use absorbent (soil, sand or other inert material). Rags are not recommended for the clean-up of spills, as they may create fire or environmental hazard. Collect and seal in properly labelled containers or drums for disposal. If contamination of crops, sewers or waterways has occurred advise local emergency services.
Disposal	Mop up and collect recoverable material into labelled containers for recycling or salvage. Recycle containers wherever possible. This material may be suitable for approved landfill. Dispose of only in accord with all regulations.
Precautions	Wear protective equipment to prevent skin and eye contamination and the inhalation of vapours. Work up wind or increase ventilation.
7. Storage & Handling	
Storage	Avoid storage of harmful substances with food. Store out of reach of children.

	Containers should be kept closed in order to minimise contamination. Keep from
	extreme heat and open flames. Avoid contact with incompatible substances as listed in
	Section 10.
Handling	Keep exposure to a minimum, and minimise the quantities kept in work areas. See section 8 with regard to personal protective equipment requirements. Avoid skin and eve
	contact and inhalation of vapour, mist or aerosols.

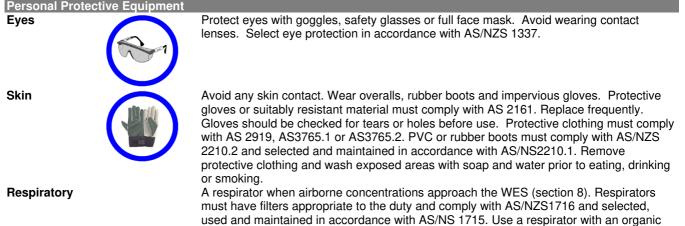

8. Exposure Controls / Personal Protective Equipment

Workplace Exposure Standards

A workplace exposure standard (WES) has not been established by WorkSafe NZ for this product. There is a general limit of 3mg/m ³ for respirable particulates and 10mg/m ³ for inhalable particulates when limits have not otherwise been established.			
NZ Workplace Exposure Stds	Ingredient No ingredients are listed	WES-TWA*	WES-STEL

Engineering Controls

In industrial situations, it is expected that employee exposure to hazardous substances will be controlled to a level as far below the WES as practicable by applying the hierarchy of control required by the Health and Safety at Work Act (2015) and the Health and Safety at Work (General Risk and Workplace Management) Regulations 2016. Exposure can be reduced by process modification, use of local exhaust ventilation, capturing substances at the source, or other methods. If you believe air borne concentrations of mists, dusts or vapours are high, you are advised to modify processes or increase ventilation.

vapour cartrdige and a particulate filter. If using a respirator, ensure that the cartridges

Page 3 of 7 November 2019

Fruity Disinfectant Safety Data Sheet

are correct for the potential air contamination and are in good working order. Fit testing and clear guidelines and training for use and maintenance of PPE are necessary.

11. Toxicological Information

	OWED: S: N: ED: COXICITY:	
Supportin	ng Data	
Acute	Oral	Using LD ₅₀ 's for ingredients, the calculated LD ₅₀ (oral, rat) for the mixture is >5,000 mg/kg. Data considered includes: Quaternary ammonium compounds, di-C8-10-alkyldimethyl, chlorides 238mg/kg (rat), EDTA, Sodium Salt 1658 mg/kg (rat).
	Dermal	Using LD ₅₀ 's for ingredients, the calculated LD ₅₀ (dermal, rat) for the mixture is >5000 mg/kg. Data considered includes: Quaternary ammonium compounds, di-C8-10-alkyldimethyl, chlorides 3342mg/kg.
	Inhaled	Using LC ₅₀ 's for ingredients, the estimated LC ₅₀ (inhalation, rat) for the mixture is >5mg/L.
	Eye	The mixture is considered to be corrosive to the eye. Quaternary ammonium compounds, di-C8-10-alkyldimethyl, chlorides is an eye corrosive and present >3%.
	Skin	The mixture is considered to be a skin irritant. Quaternary ammonium compounds, di-C8-10-alkyldimethyl, chlorides is a skin corrosive at higher concentrations.
Chronic	Sensitisation	No ingredient present at concentrations $> 0.1\%$ is considered a sensitizer.
	Mutagenicity	No ingredient present at concentrations $> 0.1\%$ is considered a mutagen.
	Carcinogenicity	No ingredient present at concentrations > 0.1% is considered a carcinogen.
	Reproductive /	No ingredient present at concentrations $> 0.1\%$ is considered a reproductive or
	Developmental	developmental toxicant or have any effects on or via lactation.
	Systemic	No ingredient present at concentrations > 1% is considered a target organ toxicant.
	Aggravation of existing conditions	None known.

12. Ecological Data

Summary	
This mixture is very toxic towards	s aquatic organisms with long lasting effects.
Supporting Data	
Aquatic	Using EC ₅₀ 's for ingredients, the calculated EC ₅₀ for the mixture is < 1 mg/L. Data considered includes: Quaternary ammonium compounds, di-C8-10-alkyldimethyl, chlorides EC ₅₀ (48 h, aquatic invertebrates) 66 μ g/L, LC ₅₀ (4 days, aquatic invertebrates) 73 - 110 μ g/L, EC ₅₀ (4 days, algae) 25 μ g/L, EC ₅₀ (72 h, algae) 22 - 35 μ g/L. EDTA, Sodium Salt 41 mg/L (fish).
Bioaccumulation	No data
Degradability	No data
Soil	No evidence of soil toxicity.
Terrestrial vertebrate	See acute toxicity.
Terrestrial invertebrate	No evidence of toxicity towards terrestrial invertebrates.
Biocidal	no data
Environmental effect levels	No EELs are available for this mixture or ingredients
13. Disposal Conside	rations
Restrictions	There are no product-specific restrictions, however, local council and resource consent conditions may apply, including requirements of trade waste consents.
Disposal method	Disposal of this product must comply with the Hazardous Substances (Disposal) Notice 2017 and the requirements of the Resource Management Act for which approval should be sought from the Regional Authority. The substance must be treated and therefore rendered non-hazardous before discharge to the environment.
Contaminated packaging	Disposal of contaminated packaging must comply with the Hazardous Substances (Disposal) Notice 2017 clause 12. Ensure that the package is rendered incapable of

14. Transpor	t Information			
Transport according to NZS 5433 (Transport of Hazardous Substances on Land). Considered a dangerous good for transport.				
UN number:	3082	Proper shipping name:	ENVIRONMENTALLY HAZARDOUS SUBSTANCE, LIQUID, N.O.S. (contains Quaternary ammonium compounds, di-C8- 10-alkyldimethyl, chlorides)

reuse or recycle packaging.

containing any substance and is disposed in a manner that is consistent with the requirements of the substance it contained and the material of the package. If possible

15. Regulatory Information

This product is an approved substance under the Hazardous Substances and New Organisms Act (HSNO). Approval code: HSR002530, Cleaning Products (Subsidiary Hazard) Group Standard 2017.

All ingredients appear on the New Zealand Inventory of Chemicals NZIoC.

Specific Workplace Controls (as per HSNO approval referenced to Controls Matrix)

Key workplace requirements are:			
SDS	To be available within 10 minutes in workplaces storing any quantity.		
Inventory	An inventory of all hazardous substances must be prepared and maintained.		
Packaging	All hazardous substances should be appropriately packaged including substances that have been decanted, transferred or manufactured for own use or have been supplied		
Labelling	Must comply with the Hazardous Substances (Labelling) Notice 2017.		
Emergency plan	Required if > 100L is stored.		
Certified handler	Not required.		
Tracking	Not required.		
Bunding & secondary containment	Required if > 100L is stored.		
Signage	Required if > 100L is stored.		
Location compliance certificate	Not required.		
Flammable zone	Not required.		
Fire extinguisher	Not required.		
Note: The above workplace requirements apply if only this particular substance is present. The complete set of controls for a			

Note: The above workplace requirements apply if only this particular substance is present. The complete set of controls for a location will depend on the classification and total quantities of other substances present in that location. Other Legislation

In New Zealand, the use of this product may come under the Resource Management Act and Regulations, the Health and Safety at Work Act 2015 and the Health and Safety at Work (General Risk and Workplace Management) Regulations 2016, local Council Rules and Regional Council Plans.

Disclaimer

This SDS was prepared by Datachem LTD and is based on our current state of knowledge, including information obtained from suppliers. The SDS is given in good faith and constitutes a guideline (not a guarantee of safety). The level of risk each substance poses is relevant to its properties (as summarised in the SDS) AND HOW THE SUBSTANCE IS USED. While guidelines are given for personal protective equipment, such precautions must be relevant to the use. The likely HSNO classifications for this SDS have been estimated based on general information from the supplier (e.g., hazard, toxicological). This SDS is copyright Datachem and must not be copied, edited or used for other than intended purpose. To contact the SDS author, email info@datachem.co.nz or phone: +64 9 940 30 80.
